P. 022 6721023 E. lars@eqstruc.co.nz

Lars started as a consulting engineer in the United States in 2016 and has worked in New Zealand since 2019. Lars' experience in New Zealand has focused on the assessment and seismic retrofit of heritage and existing structures, along with commercial and high-end residential building designs. In the United States, Lars worked as a structural engineer on buildings in the education, commercial, and multi-family residential markets. Lars also has extensive experience with the seismic performance of high-voltage substation equipment. Prior to his career as a structural engineer, Lars worked as a designer of formwork, falsework, and temporary propping for a variety of heavy-civil and high-rise construction projects.
